Re: James Bererton letter of recommendation

To whom it may concern,

I would like to acknowledge and offer my strong support of James Bererton. Utilizing his leadership and guidance we replaced existing chilled water equipment in our factory. Following his recommendations we built in energy efficiency via free-cooling in the winter. That savings alone afforded us (ROI) chiller capacity 2X greater than we had in the past. Redundancy was also factored in to the new system, which is critical to our operation, as well as a great comfort to our operations and Customers. We have worked together on several other engineering projects over the past 24 months, which resulted in my factory operating more efficiently and reducing operational cost. All the activities we executed were data based, and throughout the process James was able to provide valuable calculations and recommendations to direct our decisions.

James is an excellent engineer.

Please call me if there are any questions.

Sincerely,

Rick Ritter
